PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in software development, AI applications, and data analytics. Proficient in C++, Python, JavaScript, SQL, and Pandas, with strong knowledge of Data Structures and Algorithms. Experienced in developing real-world projects and collaborating in team environments. Passionate about learning new technologies, solving complex problems, and building scalable software solutions.

SKILLS

- **Technical Skills:** C++, Python, DSA, HTML, CSS, JavaScript, SQL.
- **Data Analysis and Visualization:** Python (Pandas, NumPy, Matplotlib & Seaborn), MySQL, MS Excel (PivotTables, VLOOKUP, Macros).
- **Soft Skills:** Customer Handling, Adaptability to New Projects, Communication, Public Speaking, Time Management.

TOOLS

- Visual Studio, Android Studio, IntelliJ IDEA, MySQL Workbench, Power BI, MS Office.

EXPERIENCE

IBM SkillsBuild Intern (Virtual)

June 2024 - July 2024

- During my IBM SkillsBuild internship, I worked on developing an AI chatbot using IBM Watson Assistant.
- Worked with **IBM Watson Assistant** to design and build intelligent conversational flows.
- Learned the fundamentals of **Conversational AI** and chatbot development.
- **Achieved a Top 6 ranking among 650+ participating teams**, demonstrating strong technical execution, innovation, and teamwork.

PROJECTS

Life Steps-

December 2023 - December 2023

- I created a web app using HTML, CSS, and JavaScript.
- Implemented a dynamic dashboard with Chart.js for 7-day calorie trends, progress bars, and a daily tips carousel.
- Created a fully installable PWA with service worker caching, dark/light mode toggle, BMR calculator, push notifications, and user authentication, ensuring seamless offline access.

Kanoonsathi-

June 2024 - July 2024

- It was a team project in which we built an AI chatbot. It was a legal Advisor for those who need a lawyer or require assistance without hiring one to solve law-related problems.
- We used IBM Watson AI Assistant.
- It addressed various legal issues, including landlord-tenant relationships.

ResQ-*Because every rescue minute matters*-

February 2025 - Ongoing

- Currently working on implementing the Smart NGO Routing algorithm and offline-first reporting synchronization module in the backend and Android application.
- resQ is an intelligent wildlife rescue coordination system that connects citizens reporting animals in distress with the most suitable NGO.
- Full-stack solution.

StudySpark – RAG-Based AI Teaching Assistant -

July 2025 - Ongoing

- Also working on an end-to-end RAG pipeline using Python, Whisper, FAISS, Pandas, and OpenAI GPT.
- Converted lecture videos into timestamped transcripts and generated vector embeddings for semantic search.
- Implemented context retrieval and prompt engineering to improve response accuracy and reduce AI hallucinations.

ACHIEVEMENTS

- Selected among the top 6 out of 650 teams at the National Level AI-ML Internship by IBM SkillsBuild!.
- Assisted in planning and conducting the Hackathon event, besides coordinating the participants and mentors. Managing the registrations was another duty in the event.
- Assisted as a Liaison Committee Member for our Annual Fest Technorazz, coordinating between organizers, participants, and sponsors to ensure smooth execution.

EDUCATION

B.Tech in Computer Science

Jaipur National University, Jaipur

2023-2027

Class XII

DAV Centenary Public School, Jaipur

2022-2023

Class X

DAV Centenary Public School, Jaipur

2020-2021
