EXPERIENCE

- Former IBM SkillsBuild Intern (Virtual)

PROJECTS

Kanoonsathi

- It was a team project in which we built an AI chatbot. It was a legal Advisor for those who need a lawyer or require assistance without hiring one to solve law-related problems.
- We use IBM Watson AI assistant.
- It addressed various legal issues, including landlord-tenant relationships.

Life Steps

- I created a web app using React.
- Implemented a dynamic dashboard with Chart.js for 7-day calorie trends, progress bars, and a daily tips carousel.
- Created a fully installable PWA with service worker caching, dark/light mode toggle, BMR calculator, push notifications, and user authentication, ensuring seamless offline access.

ResQ

- Currently working on implementing the Smart NGO Routing algorithm and offline-first reporting synchronization module in the backend and Android application.
- resQ is an intelligent wildlife rescue coordination system that connects citizens reporting animals in distress with the most suitable NGO.
- Full-stack solution (Android + Spring Boot + Database).
